Industry Presence in State

There are 17,207 FDA-regulated establishments in the State of California

Food establishments (includes cosmetics) - 47 percent

Medical device and Radiological establishments - 39 percent

Human drug establishments - 8 percent

Animal drug and feed establishments - 4 percent

Biologic establishments (includes blood banks) - 2 percent

Industry Highlights

- California has the greatest number of medical device and biotechnology firms of any area in the United States. They are concentrated in the San Francisco Bay Area, Orange County and San Diego areas.
- California is a major producer of tree nuts and the only state that produces almonds.
- California receives an estimated 25% - 30% of all FDA regulated commodities imported into the United States, and contains the largest harbor complex in the country. More than 1,200 ocean shipping containers, containing foodstuffs arrive each day in the Port of Los Angeles / Long Beach, increasing at approximately 20% annually. Additionally, with the international cargo from Los Angeles International Airport, courier hubs at regional airports, and the International mail processing facility for all of Southern California; a gateway for mail order imports of pharmaceuticals from outside the U.S. The district serves as the "Gateway to

the Orient” for imports and exports and with the import operations along the U.S. Mexico border, a significant “Gateway to Mexico.” A total of 70% of all incoming cargo is believed to stay within the state boundaries.
